GAC-NPF-DOC-ES-0212-09, REV.000

Hughes Industrial Tank Shower Chiller Suitable for Non Flameproof Areas

STANDARD FEATURES

- AISI 316 stainless steel non-ferrous plate evaporator
- AISI 304 stainless steel internal water circulation pump
- 100% stainless steel & non-ferrous internal water circuit
- Heavy duty IP65 weatherproof cabinet
- Water outlet temperatures from +15°C to +30°C
- Suitable for ambient operation 0°C to +50°C
- Digital electronic temperature control system
- 3.5 kW of cooling capacity {32°C ambient}
- Corrosion resistant epoxy condenser coating
- Internal flow switch & low level tank switch cut-out
- Serviceable air filters for protection against sand/dust environment - Replacement HEC55060

| PERFORMANCE | Cooling duty (kW) | Water Inlet (°C) | Water Outlet (°C) | Ambient (°C) |
|---------------------|----------------------|------------------|----------------------|-----------------|
| Standard Conditions | 3.5 | +27.0 | +22.0 | +32.0 |
| Design Conditions | 2.2 | +27.0 | +22.0 | +50.0 |

Refrigeration & condensation

Dimensions (mm) & weights (kg)

Refrigerant R404a, single circuit Compressors Single scroll, 1.6 kW Condensation Air-cooled axial fan

Fans 1 x 0.15 kW Length 625, depth 435, height 1,050 Operational weight 95, transport 90

Electrical requirements

Hydraulic details

Absorbed power 2.5 kW (12.2 A) max. Standard power 230V / 50 - 60 Hz / 1ph

Standard pump 0.55 kW / AISI 304

2 - 25 litres / minute Sound Flow range

Pressure range 4.2 - 0.5 BARAISI 316 inox plate Evaporator

Connections 0.5"-inlet/outlet

55 dB (A) maximum recorded in a free spherical field 3 metres from condenser coil

Standard Voltage Options

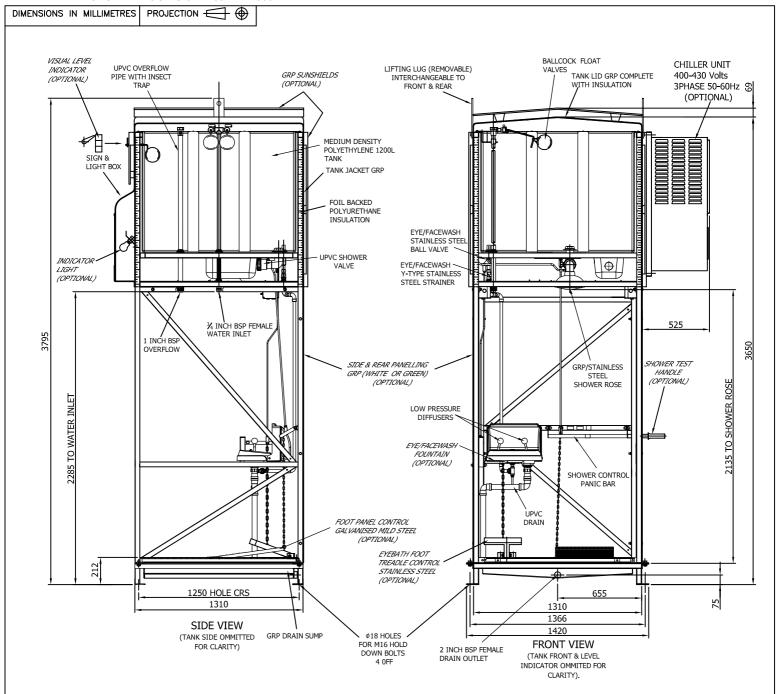

Operational Voltages available: 230 V / 50 – 60 Hz single phase, 110 V / 50 – 60 Hz single phase, 380 V – 440V / 50 Hz – 60 Hz three phase and 480 V / 60 Hz three phase. Additional serviceable air condenser filters available for protection against sand/dust environments.

NOTES:

1200 LITRE CAPACITY TANK IN MEDIUM DENSITY POLYETHELYLENE. SUPPORT FRAME AND LEGS MANUFACTURED FROM GALVANISED HOLLOW SECTION (K) OR STAINLESS STEEL HOLLOW SECTION (KS). SHOWER LEGS ARE REMOVABLE TO FACILITATE TRANSPORT.

TANK LID, TANK JACKET & SIDE PANELLING AVAILABLE IN EITHER WHITE OR GREEN GRP.

ELECTRIC SUPPLY (IF REQUIRED FOR OPTIONALS) TO BE SINGLE PHASE, 50 OR 60 HZ 240 OR 110 VOLTS.

EMERGENCY SAFETY SHOWER WITH INSULATED STORAGE TANK & EYE/FACEWASH FOUNTAIN, SUNSHIELDS, CHILLER UNIT & DRAIN SUMP.

EXP-J-14K/1200

(UK MODEL STD-J-14K/1200)

Emergency Tank Shower incorporating a 1200 litre tank to deliver a guaranteed flow of tepid water for up to 15 minutes even when the mains supply has been disrupted.

General Use Tank Showers

Hughes Safety Showers Manufacture a range of heavy duty Emergency Tank Showers, for use when tepid water is required, or a constant supply of water cannot be quaranteed.

These units are essential where there is a problem with insufficient water pressure or inadequate flow rate. This improved range incorporates models to suit a wide range of situations.

The indoor or tropical versions are insulated but without the heating to ensure a steady temperature is maintained whereas the outdoor types are heated and preinsulated to prevent freezing during conditions of frost.

Tank Showers are available in three sizes:

The 350 litre model supplies a guaranteed flow of tepid water for several minutes.

With the mains supply permanently connected the 750 litre model will deliver tepid water for the 15 minutes recommended by the ANSI standard.

The 1200 litre model will meet the standard even without an external supply connected.

EXFP:-U2-09/REV40K/1200

(UK MODEL STD-J-14K/1200)

The water tank is manufactured in medium density polyethylene and insulated with foil backed polyurethane insulation. The insulation is enclosed within a tank surround in either white (or green) Glass Reinforced Plastic (GRP). The tank casing is distinctively marked with green and white safety stripes and incorporates a combined Safety Sign and optional Light Box.

The frame is manufactured from either Galvanised Steel (EXP-J-14K/1200) or Stainless Steel (EXP-J-14KS/1200) ensuring a robust and long lasting structure which is virtually maintenance free.

The frame is mounted on four galvanised steel or stainless steel legs, each leg having a fixing plate drilled 17mm for four M12 holding down bolts.

The shower is normally activated when the Panic Bar is depressed. Alternatively it can be activated when the casualty stands on the optional Foot Panel. An extension of the Panic Bar can be fitted to allow shower testing to be easily carried out without the operator getting wet.

To prevent overspray the frame can be fitted on three sides with enclosing Panelling made from white (or green) heavy duty GRP. This same panelling acts as a barrier, protecting both the water spray and the user from the elements.

The Light Box incorporates pictogram 'Shower' signs to EC standard 92/58/EEC. The light (optional) illuminates the signs for greater visibility on dull days and at night. Diffusers also shine downwards to ensure the operating mechanism and shower areas are well lit at all times.

An optional externally mounted Facewash Fountain is available which incorporates an integral lid connected to the water valve to automatically operate the Facewash when opened. The lid ensures that the bowl remains clean and free from contamination when not in use. The lid is fitted with a mirror with first aid instructions. Alternatively, a hand-held Eyebath can be fitted. Both the externally mounted Facewash Fountain or the hand-held Eyebath can be fed either from the tank or from the mains. A tank feed ensures a constant flow and has the advantage of reducing the problems caused by overheating of the supply pipe. A mains supply has the advantage of using fresh potable water and can be used as a test to ensure there is a sufficient water flow into the tank.

A range of further additional options are available (see Optional Fittings section) to enhance the function and safety of the Tank Shower unit.

UNIT DIMENSIONS & PACKING SPECIFICATIONS UK SPECIFICATION LENGTH WIDTH **HEIGHT** GROSS (cm) (cm) (cm) (kg) UNIT DIMENSIONS (UNPACKED) - NO OPTIONS 367 148 132 177 UNIT DIMENSIONS (UNPACKED) - STD OPTIONS 367 148 360 PACKED ON SKID & WRAPPED - NO OPTIONS 382 150 151 335 PACKED ON SKID & WRAPPED - STD OPTIONS 382 151 194 405 **EXPORT SPECIFICATION**

The Tank Shower Legs can be removed and flat packed to reduce volume when shipping (EXP models). Although volume is similar to UK packing for a single unit, a great deal of space can be saved for 2 or more units when packed this way.

| MATERIALS LIST FOR HUGHES EMERGENCY 1200 LITRE TANK SHOWER | | | | |
|--|--|--|--|--|
| SHOWER ROSE | 1/2" BSP GRP/Stainless Steel Rose. Delivers 75 litres/minute | | | |
| CONTROL VALVE | uPVC 1-1/2" BSP Ball Valve. Effast Type 22 to BS4346 Part 1. Tested to works cert DIN 50049-2- | | | |
| CONTROL VALVE TANK CONNECTION | uPVC tube fastened to tank with 1-1/2" BSP uPVC flanges to BS3505 | | | |
| WATER INLET | 3/4" BSP coupled to uPVC tube | | | |
| OVERFLOW | uPVC tube fastened to tank with 1" BSP uPVC flanges to BS3505 | | | |
| BALLCOCK VALVE & FLOAT | 2 x 1/2" BSP Brass Ballcock Valve to BS1212/PE2 with 5" Float | | | |
| VALVE LEVERS | Red Reinforced Nylon | | | |
| SHOWER CONTROL BAR | Stainless Steel Grade 321 Schedule 5 Tubing, Plastic Coated Red | | | |
| TANK CLADDING & LID | Heavy Duty GRP (Green or White) | | | |
| INSULATION | Foil Backed Polyurethane | | | |
| EYEBATH/FACEWASH TANK CONNECTION | uPVC tube fastened to tank with 1/2" BSP uPVC flanges to BS3505 | | | |
| EYEBATH/FACEWASH VALVE | 3/4" to 1/2" Brass Hexagonal Full Flow Ball Valve with Stainless Steel Ball and PTFE Seats | | | |
| EYEBATH/FACEWASH STRAINER | 1/2" Brass "Y" Strainer with 100 mesh Monel Filter Basket | | | |
| PULL RODS FOR VALVE OPERATION | Stainless Steel Grade 304 Round Bar | | | |
| FACEWASH DIFFUSERS | 2 off Red Nylon Spherical Diffusers | | | |
| SWAN NECKS | 2 off Stainless Steel 316 SCH 40 | | | |
| FLOW REGULATOR TEE | Black Nylon with Three Pronged Regulator | | | |
| FACEWASH BOWL (COMPLETE) | White Injection Moulded GRP with Integral Safety Mirror | | | |
| PANEL TYPE FOOT CONTROL | Mild Steel to BS4592 Galvanised to BS729 | | | |
| FOOT PANEL SUPPORT SPRINGS | Stainless Steel EN58A type 302 | | | |
| FOOT PANEL CHAIN | Mild Steel Galvanised to BS729 | | | |
| REAR & SIDE SCREENS | Heavy Duty GRP White (or Green) | | | |
| WATER TANK | 1200 Litre Capacity Medium Density Polyethylene | | | |
| FACEWASH DRAIN | 1 ½" BSP to 1 ¼" White uPVC Tubing & Elbows | | | |
| SHOWER FRAME & LEGS | Mild steel hollow section galvanised to BS729 and exposed metal over-painted with silver Hammerite enamel paint, or Stainless Steel type 304L with semi-polished finish | | | |
| ALL FASTENERS | Stainless Steel A2 | | | |
| | | | | |
